SUMMARY

Passionate Computer Science & IT graduate from the University of Hertfordshire, eager to bring technical skills to a fast-growing social platform expanding into the UK and European markets. Experienced in Python, JavaScript, PHP, and React Native through real-world academic projects including full-stack healthcare platforms and a cross-platform mobile application. Strong foundation in backend systems, relational databases, and application design, with familiarity in Agile workflows and collaborative development using Git/GitHub. Excited to grow alongside an ambitious team and help shape a product that connects people at scale.

PROFESSIONAL EXPERIENCE

Weillo – Health Tracker
Full-Stack Healthcare Management Platform
Technologies: PHP, JavaScript, HTML, CSS, MySQL

- Developed a healthcare web application using PHP and MySQL
- Implemented secure authentication systems and profile management
- Built appointment booking and CRUD functionality
- Designed backend controllers and relational database systems
- Applied software architecture and MVC-style principles

Robodent – Dental Management System
Healthcare Appointment & Management System
Technologies: PHP, MySQL, JavaScript

- Developed a healthcare web application using PHP and MySQL
- Implemented secure authentication systems and profile management
- Built appointment booking and CRUD functionality
- Designed backend controllers and relational database systems
- Applied software architecture and MVC-style principles

Machine Learning – Parkinson's Diagnosis System
Python Machine Learning Project
Technologies: Python, Machine Learning, PCA, SVM, Data Analysis

- Developed a machine learning prediction system using Python for Parkinson's disease diagnosis analysis.
- Applied PCA (Principal Component Analysis) for dimensionality reduction and SVM (Support Vector Machine) for classification.
- Performed data preprocessing, feature analysis, model training, and prediction evaluation.
- Improved understanding of machine learning workflows, medical datasets, and classification systems.

Calorix – React Native Mobile Application
Mobile Health & Nutrition Tracking App
Technologies: React Native, JavaScript, Mobile UI Development

- Developed a cross-platform mobile application focused on calorie tracking and nutrition management.
- Implemented food logging, dashboards, profile handling, favorites, and local storage functionality.
- Built responsive mobile UI components and improved understanding of React Native application architecture.
- Worked with component-based design and mobile user experience workflows.

TECHNICAL SKILLS

Programming
- PHP
- Java
- Python
- React Native

Web Development
- HTML
- CSS
- JavaScript

Databases
- MySQL
- SQL
- Database Design
- PHP Admin

EDUCATION

University of Hertfordshire
BSc (Hons) Computer Science & Information Technology

Relevant Modules:
- Software Architecture
- Machine Learning
- Neural Computing
- Responsible Computing
- Real-time Systems
- Internet of Things
- Mobile Computing

TMC Academy
Higher National Diploma (HND) – Infocomm Technology

Relevant Modules:
- Database Systems & Applications
- Application Programming with Java
- Web Programming & Applications
- Development of Mobile Applications
- Object-Oriented Programming with C++
- Cloud Computing Concepts
- Information Systems Analysis & Design
- Network Operating Systems
- Project Management

SOFTWARE ENGINEERING | SYSTEMS & INFRASTRUCTURE

- Software Architecture
- CRUD Applications
- Git & GitHub
- Object-Oriented Programming
- Networking
- Linux / Ubuntu
- Expo.dev
- Android Studio
- Machine Learning
- IoT Systems
- Embedded Systems
- Real-time Systems

ADDITIONAL INFORMATION

- Eligible to work in the United Kingdom under Graduate Visa status
- Strong academic background in Software Engineering, Full-Stack Development, Databases, and Mobile Applications
- Experienced in developing web, desktop, and mobile applications through university and personal projects
- Familiar with Agile development methodologies, collaborative workflows, Git/GitHub version control, and iterative software development practices.
- Passionate about learning modern technologies and building practical real-world systems

May 2014 - May 2016

Jan 2023 - Present

Feb 2021 - Dec 2022

Aug 2016 - Oct 2019

University of Engineering UX Cohort

- Major in Automotive Technology.
- Thesis on "Technological Advancements within the current Mechatronics Industry”.
